SUMMARY

Full-Stack web developer looking to assist in designing web pages and back-end servers. Passionate about both people and computers. Challenges are preferred. Willing to spend as much time as necessary to solve a problem. Will happily go into unfamiliar territory for the opportunity to learn. Team experiences are welcome but working solo is good as well. Experienced in JavaScript, HTML, CSS, and the full MERN stack. Has built full scale apps that mimic social media and weather apps.

TECHNICAL SKILLS

Languages: CSS, JavaScript, HTML, MERN Stack
Applications: Node, React, Hard CSS/HTML

PROJECTS

GifTastic | https://github.com/bones2421 | https://bones2421.github.io/GifTastic/
- GiftTastic is an app that allows the user to pull gifs based on buttons or search criteria. They can also make and remove buttons.
- Utilize Giphy API to pull data and insert functionality for buttons and search
- Used HTML, CSS, and event listeners in JavaScript

TriviaGame|https://github.com/bones2421|https://bones2421.github.io/unit-4-game.bones2421.github.io/
- An app that will display a quiz before the user. The user will have to answer trivia questions within a given time. They will then be given a score at the end.
- Utilize timers in JavaScript with moment.js
- Used HTML, CSS, and JavaScript to provide visuals and functionality

Word Guess Game | https://github.com/bones2421 | https://bones2421.github.io/Word-Guess-Game.bones2421.github.io/
- Hangman game. The user must try and guess the word by using the image and the dashes on screen as hints.
- Responsible for setting restrictions so the user would not break the app. Set up structure.
- Used HTML, CSS, and JavaScript to play sounds, provide images and make the framework

EXPERIENCE

Inbound expert at TARGET: July 2018-May 2019

At Target employees are expected to work across departments, handle a heavy workload, be up and active for extended periods of time, and serve customers. For the position of Inbound Expert all these things are involved. The focus here is on handling freight, unloading/loading, and stocking the shelves. Inbound Experts are in the store before it opens and will usually stay

after hours as well. In bound experts work hard to ensure everything is on the shelves and that they are fully stocked.

- At Target I lifted freight others were not able to lift
- I kept track of stock in the back room and organized it so other employees could access anything they needed
- On many occasions I would patrol the back room and look for anyone who needed help
- I helped customers on the floor as well when I was stocking or unloading

Computer Refurbishment Technician/Computer Disassembly technician | Blue Star Recyclers | August 2015 to February 2016

At Blue Star Recyclers I worked with computers and people to aid in keeping waste out of the landfills. I disassembled computers of all types and ages. Eventually, I switched over to the refurbishment department and worked the front desk as well. I even helped with pickups. During these we would take an empty truck to businesses that called us, and we would pick up old or broken electronics they wanted to recycle.

- Here I disassembled and refurbished around 40 computers in an 8-hour shift
- I handled the organization of the warehouse portion of the business
- When I switched over to refurbishment, I was the one who would hand off the computers to those in federally funded housing
- We worked with a company called pc's for people and I bridged the gap between us and them by helping them sell computers and by providing the computers

EDUCATION

Web Development Certificate: University of Denver Coding Bootcamp, Denver, CO
A 6 month long intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
